

## Coming together during isolation with Lighting Design

### The Challenge....

The challenge is for you to create (up to) a 30 second video with your phone or camera, using a single light source. This could be a torch, some fairy lights, a simple RGB led fixture or whatever is around in the home environment or even in your garden or shed!

Get creative and **#LightUp** an object or person in an original way.

Lets come together and create something magical. As lighting designers we are often tasked with creating a sense of a mood or feeling on stage. Let's use these skills and keep the creative ideas going.

Video clips (no longer than 30seconds) can have any theme that connects you (even if we can't physically be together!) but have to include light and colour.

Things to think about...

- How lighting people and objects can still make dark situations beautiful.
- How do we shine light to darkness, bring out the sense of beauty and drama, surprise people with the effects of light.?
- What's helping to keep your spirits up while we all **#StayAtHome**? Your mini-film you could reveal your treasured book or favourite game that's keeping you positive and motivated during this strange time.

### The Rules...

No audio or talking on the video, the end product will be silent with some basic background music for use on Facebook and will possibly be used at an upcoming show or film festival.

You have a week the deadline for entries is Friday 3 April 5pm

Email your mini films to [jamie@barbicantheatre.co.uk](mailto:jamie@barbicantheatre.co.uk) (WeTransfer, google drive, drop box if you need to)

Once we have all the films we will be editing them all together and putting it out on social media as soon as possible.

Happy lighting everyone.

## Deadline: 5pm Friday 3 April 2020
